**(l) Counterparts.** This Agreement may be executed simultaneously in two or more counterparts, each of which will be considered an original, but all of which together will constitute one and the same instrument.

## **Exhibit B**

### **EXCLUDED COMPONENTS**

- (a) Any third party or open source library included within the Software**

## **Exhibit C**

**Licensing Restrictions.** The Software licensed hereunder is subject to the following licensing restrictions.

The parties understand that the modules of the Software are licensed as noted in this section. The term “Target System” means any computer system containing one or more Processors based upon any architecture, running any operating system, excluding computers running IBM MV-S, OS/390 and related “mainframe” operating systems. The Term “Processor” means a computation hardware unit such as a Microprocessor that serves as the main arithmetic and logic unit of a computer. A Processor might consist of multiple “Cores”, in which case licenses shall have to be purchased on a per-Core basis. A Target System may have one or more Processors, each of which may have one or more Cores. In the sections below, Cores may replace Processors as applicable.

- (a) If the Software is Fiorano ESB Enterprise Server, FioranoMQ Peer, Fiorano Middleware Platform SOA server, FioranoMQ JMS Server, Fiorano API Management Server, Fiorano API Gateway Server, Fiorano API Analytics or Fiorano Developer Portal then the Software is licensed on a per Processor basis on a single Target System, where the total number of Processors on the Target System may not exceed the total number of Processors licensed, with the additional restriction that only a single instance of the Fiorano ESB Enterprise Server may run on a single Target System and that a separate license must be purchased for each instance of the products mentioned in this section for each Processor;
- (b) If the Software is Fiorano SOA Tools or Fiorano Mapper Tool or any Fiorano Test and/or Development license, then the Software is licensed on a per-named-user basis, where the total number of named users may not exceed the total number of named users licensed;
- (c) If the Software is a Fiorano Business Component of any kind (including but not limited to Fiorano HTTP, SMTP, File, Database, and other Business Components, etc.), then the Software is licensed on the basis of the number of Processors of the Target System on which the FioranoMQ Peer (to which the Business Component connects runs). A separate license needs to be purchased for each CPU of each Target System of each FioranoMQ Peer instance to which any Business Component connects.

**Evaluations:** Licenses used for evaluation cannot be used for any purposes other than an evaluation of the product. Existing customers must purchase new licenses to use additional copies of any Product and may not use evaluation keys in any form. All evaluation keys are restricted to 45-days and extensions need to be applied for explicitly. Any misuse of evaluation keys shall be subject to a charge of 125% (one hundred and twenty-five percent) of the license fee plus 20% support.

**Non-Production Environments:** For all non-production environments referenced on the Order Form (including all HA (high-availability), QA, Staging and Development environments), the following is understood: each non-production environment is an exact replica of the Production Environment from the standpoint of the number of copies of the Fiorano ESB Enterprise Server, FioranoMQ Peer, Fiorano SOA server and/or FioranoMQ Server (JMS) licensed. Each non-production environment is licensed on the exact same number and configuration of CPUs and/or Cores as the corresponding Production Environment.

**Run-Time Libraries:** The Fiorano ESB Enterprise Server, FioranoMQ Peer, Fiorano SOA server and FioranoMQ Server (JMS) products are “server” products, each of which has a runtime library associated with it. The runtime library may be freely bundled with and/or used for internal development purposes by all Users who have licensed at least one production copy of the corresponding Server Software.
