

FIORANO REMEDIES BUSINESS INTEGRATION CHALLENGES AT SJS DISTRICT

“Fiorano SOA platform is a future-proof solution which provides the value of time saved, reduced effort and flexibility for the customer.”

**Solution Consultant
Beijing Shubei Software Technology**

BUSINESS PROBLEM

When the district government officers needed data from its controlled agencies and hospitals in the health sector for data analysis and generated reports, it took several days for its subordinated agencies to collect data from their systems and submitted their reports in different formats. These data reports then had to be assembled manually, and it turned out to be a tedious work and also easily causing errors. In an emergent disease crisis, the government requires prompt data reports to make critical decisions.

The problem with the current manual data collecting process and report generation process caused the delay for decision making which might affected the district government operations.

SOLUTION

The proposed solution was to build a central database and used Fiorano technology for exchanging data to the central database from the heterogeneous databases in the subordinated agencies to develop data analysis and report generation applications for decision making.

WHY FIORANO

The value of the Fiorano solution is to have easier change management, secure and reliable data exchange, easier to deploy new data exchange processes and easier to integrate more heterogeneous database systems. By adopting Fiorano technology, the data got exchanged quickly to the central database for further application developments. Fiorano SOA platform is a future-proof solution which provides the value of time saved, reduced effort and flexibility for the customer.

ABOUT FIORANO SOFTWARE

Founded in 1995, Silicon Valley based Fiorano is a USA (California) Corporation, a trusted provider of Digital Business Backplane and enterprise integration middleware, high performance messaging and peer-to-peer distributed systems. Fiorano powers real time, digital enterprises with bimodal integration and API Management strategy that leverages the best of systematic (centralized, high-control) and adaptive (federated, high-speed) approaches to deliver solutions across cloud, on-premise and hybrid environments. Fiorano operates through its worldwide offices and a global network of technology partners and value-added resellers.

Global leaders including AT&T Wireless, Boeing, British Telecom, Federal Bank, L'Oréal, McKesson, NASA, POSCO, Rabobank, Royal Bank of Scotland, Schlumberger, US Coast Guard and Vodafone have deployed Fiorano to drive innovation through open, standards-based, event-driven real-time solutions yielding unprecedented productivity.
