

ZUNYI DISTRICT DRIVES THROUGH EFFICIENCY GAIN WITH FIORANO

“Fiorano SOA platform is a future-proof solution which provides the value of time saved, reduced effort and flexibility for the customer.”

Solution Consultant
Beijing Shubei Software Technology

BUSINESS PROBLEM

Zunyi is a small city in the mountain area of Guizhou province in the southwest of China mainland. Zunyi is famous in the Chinese revolutionary history due to the “Zunyi Meeting” held in 1935 by the Red Army on the famous Long March, in which Chairman Mao’s leadership position in the Red Army was recognized.

Although the city’s economy is falling far behind those cities in the coastal areas of China, Zunyi’s government decided to start its e-government initiative for the goal of more opening government to attract more investments into the poor region. The problem for the city government’s website was that some information data for publishing on the website didn’t get updated quickly and had to be done manually by copying data between the internal database and the external database serving the internet publics across a firewall. Copying data manually between databases caused the delay of information got published and data errors introduced by human operations.

SOLUTION

The proposed solution is to exchange data between the two databases across the firewall and have the public needed information got published on the website in a real-time and automatic manner.

WHY FIORANO

The value of the solution is to have easier change management, easier to deploy new data exchange processes and easier to integrate more heterogeneous database systems. By adopting Fiorano technology, the manual data exchange processes got automated and the information in the two databases got synchronized which saved a lot of time and avoided human errors. Fiorano SOA platform is a future-proof solution which provides the value of time saved, reduced effort and flexibility for the customer.

ABOUT FIORANO SOFTWARE

Founded in 1995, Silicon Valley based Fiorano is a USA (California) Corporation, a trusted provider of Digital Business Backplane and enterprise integration middleware, high performance messaging and peer-to-peer distributed systems. Fiorano powers real time, digital enterprises with bimodal integration and API Management strategy that leverages the best of systematic (centralized, high-control) and adaptive (federated, high-speed) approaches to deliver solutions across cloud, on-premise and hybrid environments. Fiorano operates through its worldwide offices and a global network of technology partners and value-added resellers.

Global leaders including AT&T Wireless, Boeing, British Telecom, Federal Bank, L'Oréal, McKesson, NASA, POSCO, Rabobank, Royal Bank of Scotland, Schlumberger, US Coast Guard and Vodafone have deployed Fiorano to drive innovation through open, standards-based, event-driven real-time solutions yielding unprecedented productivity.
